Education

B.S. Computer Science and Engineering, The Ohio State University	May 2013
B.A. Japanese, The Ohio State University	May 2013
M.S. Computer Science, Georgia Institute of Technology	August 2018

Employment

PreOncology

Senior LLM Engineer

February 2026 - September 2026

- Built a scalable **RAG** pipeline processing 10,000+ oncology PDFs from PubMed, using **Python** for automated downloads, **Docling** for document processing, and **PostgreSQL** for chunked data storage and retrieval.
- Implemented a hybrid **RAG** retrieval system combining **vector similarity search** and **BM25** keyword search, with **Reciprocal Rank Fusion** (RRF) to improve document ranking and retrieval relevance.

InnoVet Health

Senior Data Scientist

November 2023 - February 2026

- Built and deployed a **Python**-based **ETL** pipeline hosted on **Databricks** that ingests and processes VA mobile app reviews from Google Play, Apple App Store, and VA Mobile to enable data-driven identification of recurring usability issues and development priorities.
- Developed a **RAG** pipeline leveraging vector search and **LLM**-based summarization to extract recurring patterns and sentiment trends from user feedback for the VA's mobile applications, enabling data-driven prioritization of feature improvements and bug fixes.

Battelle Memorial Institute - Columbus, OH

Data Scientist - Health Analytics

October 2018 - November 2023

- Developed an **NLP** pipeline in **Java** for text extraction from Twitter/PubMed, and fine-tuned NER/SR BERT models in **Python** to extract health-related entities and relationships.
- Identified emerging topics in the Healthcare domain with **NLP** techniques (NMF, LDA).
- Built an ETL pipeline in **Python** to download white papers and extract Bibliometric metadata
- Re-engineered CDC applications into an **Angular** app for wide-spread use.

JPMorgan Chase & Co. - Columbus, OH

Application Developer / Risk Strategy Associate

July 2013 - October 2018

- Re-engineered proprietary customer management applications from Cobol to **Java**
- Developed Regulatory and Underwriting Report automation in **SAS** and **SQL**.
- Built **Tableau** Dashboards to provide insight into business performance.

Technical Skills

Python - PyTorch, Pandas, NumPy, Scikit-Learn, BeautifulSoup, Selenium, PySpark

Machine Learning - Deep Learning, Natural Language Processing, HuggingFace, Ollama, AWS Bedrock

C#, Java, TypeScript/JavaScript, R, SQL, Database Architecture, Power BI
